## NVIT Income Bond Fund

In accordance with the authoritative guidance on fair value measurements and disclosures under GAAP, the Fund determines the fair value of its investments in accordance with a hierarchy that prioritizes the various types of inputs used to measure fair value. The hierarchy gives the highest priority to readily available unadjusted quoted prices in active markets for identical assets (Level 1 measurements) and the lowest priority to unobservable inputs (Level 3 measurements) when market prices are not readily available or reliable. The three levels of the hierarchy are summarized below.

- Level 1: Quoted prices in active markets for identical assets
- Level 2: Other significant observable inputs (including quoted prices of similar securities, interest rates, prepayment speeds, credit risk, etc.)
- Level 3: Significant unobservable inputs (including the Fund's own assumptions in determining the fair value of investments)

Changes in valuation techniques may result in transfers into or out of an investment's assigned level within the hierarchy.

An investment's categorization within the hierarchy is based on the lowest level of any input that is significant to the fair valuation in its entirety. The inputs or methodology used to value investments are not intended to indicate the risk associated with investing in those securities and investments.

The following is a summary of the inputs used to value the Fund's net assets as of March 31, 2011:

Asset Type*	Level 1	Level 2	Level 3	Total
<b>Assets:</b>				
Exchange Traded Fund	\$ 119,839	\$ -	\$ -	\$ 119,839
